

Sales • Service • Parts • Pre-Owned • Rentals

Komptech's Crambo is a low-speed, dual-shaft shredder engineered to deliver high-throughput shredding for wood and organic waste.

**It's In Our Name & How We Do Business**

Simplicity Equipment & Service is the premier dealer for material processing equipment, service, and parts in New England, New York, and New Jersey. Heavy material handling equipment of any size is all we do. Whether you need new or pre-owned heavy machinery sales, rental units, service, and parts, this is the one place you can count on. Since 1997, Simplicity Equipment & Service has served all of New England including New York and New Jersey by offering the top name brands in the business

Whether it is shredders, separators, screeners, stackers, or turners, we service all makes and models. We have a full staff of heavy equipment specialists and a fleet of heavy-duty service trucks. And when it comes to parts, no one finds and delivers

parts better for any type of processing equipment than Simplicity Equipment & Service.

**Our Team Is Your Team**

Two words describe why we are New England's premier material handling equipment supplier. Our Team. Even though we have been around for three decades, our team is diverse and rich with experience in products, sales, service, parts, and just plain business sense. We don't have customers. We have partners. This means everyone has a stake in each other's success. Any dealership can offer name-brand products, but we are different because we work with you on ideas and solutions. Our team has one focus. You.

**Count On Us When It Really Counts**

Your expectations are high but so are our standards

- The Northeast's full-service dealership – sales, service, parts, & rentals
- Carry the country's top brands such as Komptech, R.D. Olson, MGL, Indeco, Dymax, & Corrosion Engineering
- Certified heavy equipment service professionals available 24/7
- Service and repair all small, medium, and large material processing machines
- A fleet of service vehicles that can solve most issues on the jobsite or at our location
- Northeast region's leader in finding quality parts at a reasonable price
- Ever-changing supply of pre-owned equipment of all types
- High-quality rental units with customized contracts

**Here's What They Say**

*"We got our Komptech Topturn X4500 in 2020 and have been extremely happy with it. The guys at Simplicity Equipment & Service have been terrific with ensuring we had the training and answered any questions immediately. The combination has been great for our operation."*

**Clark Kadis**  
Agricultural Coordinator  
The Farm at GreatHorse,  
Massachusetts

*"We own a couple R.D. Olson 616 screeners so we have been using Simplicity Equipment & Service to find parts we needed. Their technical support has been fantastic!"*

**Mike Maglieri**  
Plant Manager  
Western Maine

*"We have had a long and very good relationship with Komptech and Simplicity Equipment & Service. We own a Terminator, Crambo, and now we are looking at a few other units. Simplicity's professionals don't make a sale and disappear. They have come down and checked in on us regularly to find out how they can assist us with our operation. The service team is top-notch."*

**Nick Guarino**  
Operations Director  
Long Island, NY

The Nemus 2700 mobile hydraulic drum screen is built for high throughput screening of heavy soil, compost, mulch, and other waste materials.

### The Leader in Material Processing Around The World

With a specialized product portfolio that includes over 30 different types of machines covering all key processes in modern waste handling, a consultative guiding approach to solution development for customers, and full-service after-sales support and parts, Komptech Americas has become a leading supplier to the recycling and waste processing industry.

Komptech began in Austria but became one of the first companies in Europe to introduce equipment built to process organic waste. It was here that the precise European engineering behind the current material processing equipment took shape. And, although the first Komptech machine was sold in the United States in 1999, the Komptech brand wasn't established in the West until 2007, when Komptech Americas was founded.

## BUILT TO PRODUCE

Simplicity Equipment & Service began with Komptech in the early 2000s and offers the entire Komptech line of shredders, turners, screeners, and separators. We also carry all official parts and service information.

### Whatever Your Need, We Build It

We service four main categories of material processing which covers almost all processing situations. We have two shredders for initial processing, windrow turners, both star and trommel screeners, and finally specialty separators. To learn more, go to [www.KomptechAmericas.com](http://www.KomptechAmericas.com)

Specifically built to separate plastic, the Hurrikan S mobile high-throughput windsifters remove light fraction plastics, rocks using a patented "pressure-suction" process.

A low-speed, high-torque single shaft shredder, the Terminator processes all types of waste including contaminated C & D debris, bulky waste, mattresses, tires, and municipal solid waste.

The Topturn X4500 is a robust windrow turner perfect for small and medium-sized operations.

A true star screener, Komptech's Multistar XL3 is a high-throughput 3- or 2- fraction star screen designed for medium and large volume producers of mulch, soil, and compost.

Tough as the materials it screens, the RDO 616 screener is available in 2- or 3-deck models and thoroughly sorts rock, stone, concrete, and sand.

## ROCK SOLID TOUGH

### **If It Needs Crushing, Washing, Or Screening – We Do It.**

R. D. Olson builds quality and they are only built in the United States. For three decades R. D. Olson's mission is building for its customers the strongest, over-engineered, best aggregate rock crushing, screening, recycling, conveying piece of equipment money can buy. Formerly the contract manufacturer for CEC machines for more than 30 years, R. D. Olson knows the market and customers so its products fit a variety of aggregate operations. The tale of the tape says it all - fabricating more than 580 Jaw, Cone, Horizontal Impact and Vertical Shaft Impact crushers, 1,200 portable screening plants "both wheeled and on tracks".

RDO has constructed more than 140 wash plants, as well as, fabricating sandscrews and coarse material washers. In addition, the Washington-based manufacturer sent thousands of conveyors and radial stackers that accompany these systems into the world market.

All the employees pride themselves in the fact that they build custom specialty equipment for projects that arise requiring imagination, engineering, and creativity that it feels a manufacturer must provide to our customers in the marketplace.

### **We Are Crushin' It!**

If it is in the aggregate category of material processing, R. D. Olson crushes it, washes it, screens it, or separates it. To really get the complete story and all the products available, to learn more, go to [www.rdolsonmfg.com](http://www.rdolsonmfg.com).

All American made, R.D. Olson has been building quality crushers, screen plants, conveyor systems, and washing plant gear for more than 35 years.

### Two Decades of Manufacturing Conveyors/Stackers

Since 1998, MGL Engineering Inc has manufactured over 3,000 conveyor/conveyor systems, crushing and screening systems, recycling plants, and other custom systems. Its three principals have combined over 100 years of experience in the material handling industry.

The company operates from an 11-acre manufacturing facility where it has produced material processing and handling systems for projects throughout the USA as well as Canada, Mexico, the Caribbean, Latin America, and Africa.

The MGL range of equipment runs from large custom-designed static crushing, screening, washing, recycling, and conveyor

systems to portable (tracked or wheeled) systems for the rock, aggregate, recycling, and other material processing industries.

Being a smaller company allows MGL to be extremely nimble, allowing for seamless communication between our customers' technical staff and ours. MGL operates a fully-stocked store for parts

availability and also has service vehicles for onsite maintenance, as well as other services.

### Reliable Conveyor Quality & Built To Last

When it comes to conveyors, no one matches MGL's experience, quality, and reliability. To really get the complete story and all the products available, go to [www.mglengineering.com/conveying](http://www.mglengineering.com/conveying).

The MGL 842 T is an 80' tracked stacker with a conveyor that has a 42" wide smooth belt, a reversing fan, and a fuel-efficient motor.

### Quality Attachments

Indeco North America is dedicated to delivering quality, innovative solutions that significantly improve the performance of our customers' initiatives. By empowering our employees to constantly find better ways to do great work, the company remains passionate in our pursuit of developing pioneering technologies and products that provide lasting benefits to our customers and the communities in which we operate.

Continually striving for excellence, constantly improving our processes and products and consistently focusing on our Northeast customers' needs are the benchmarks that guide Indeco's every activity. Through insight, experience, knowledge and perspective secured from over two decades of serving the global

construction, demolition, mining, scrap and recycling industries, our continuing commitment is to deliver leading-edge products and services that exceed our customers' quality and performance expectations, meet their budgetary and deployment goals and help them achieve a significant competitive advantage.

### The Right Tool For Every Job

With a long history of technology firsts that are now accepted as industry standards; including the world's largest hydraulic breaker, the HP25000, Indeco North America is the "Go-To" source for the toughest, most reliable

equipment used in the construction, demolition, aggregate, mining and scrap industries. Indeco is the choice for landclearing, recycling, material processing and demolition. Their core lines include hydraulic breakers, compactors, mulching heads, multi grabs, pedestal booms, pulverizers, and steel sheers. For more information, go to [www.indeco-breakers.com](http://www.indeco-breakers.com)

Below – Indeco has the industry's widest range of tough, fuel-saving intelligent hydraulic breakers for the demolition of rock, concrete, and other materials in aggregate, pipeline, and highway applications

Rotating Shear

Dymax General Purpose Buckets for Wheel Loaders, Track Loaders, Toolcarriers and Telehandlers are designed and built to provide years of productive use and service

### Dymax Has Been Shaping Metal Into Useful Tools For 135 Years

What's in a name? Sometimes not much. Often everything. Dymax was born amidst the values and beliefs of the Balderson family. It's a name that has long stood for quality, integrity, and service.

Dymax Inc. is a diversified supplier to the agricultural, construction, forest, mining, and rail industries. For material processing equipment, Dymax work tool attachments are added to construction machinery.

For more than 130 years, Dymax has produced work tool attachments for backhoes, loaders, dozers, excavators, skid steer loaders, telehandlers, wheel loaders, and track loaders.

### The Right Tools For Heavy Equipment

To find out about Dymax tools including everything from three-way side buckets to millyard forks to rock bucket excavators and everything in between, check out all the tools and accessories you may need

for construction, material processing, agricultural, and mining equipment, log onto [www.dymaxinc.com](http://www.dymaxinc.com).

Dymax accessories are suited for machines with higher breakout forces, and are designed to match individual loader characteristics, typically yielding additional capacity and production.

### Supplying Advanced Materials and Technology To Material Processing Equipment

With over 40 years of proven history engineering intelligent solutions to tens of thousands of difficult applications, Corrosion Engineering understands the problem heavy equipment users face. Corrosion's mission is to help build custom, cost-effective solutions to keep your operation running at maximum performance. Its core business is producing rubber and ceramic lining and protective layers for haul trucks, feeders,

conveyors, and a variety of machines for material processing.

Corrosion Engineering solutions are custom-designed and manufactured to ensure optimal performance in every specific application. CE's innovative steel, rubber, and ceramic products are proudly designed and hand-crafted in the USA with every product meeting the highest quality standards.

This unique wear-resistant liner features high alumina ceramics combined with the energy-absorbing characteristics of high tensile premium rubber.

### Trusted, Innovative Technology for the Mining & Aggregate Industry

Find out more about all the products available, go to [www.corroeng.com/](http://www.corroeng.com/)

Corrosion Engineering's haul truck bed liners provide exceptional wear and impact resistance to dramatically increase availability, decrease maintenance, and improve productivity in your fleet

# PRE-OWNED

## A Wide Variety Of Equipment Priced Right For Any Operation

We understand that unexpected situations or opportunities arise and budgets are stretched thin. That means you need

creative solutions. We understand what that is like. Our customers need a partner that can find what they need when they need it at a price they can afford. We have developed relationships across the

country to find pre-owned equipment for Northeast customers. Regardless of make, model, or condition, we can find a machine that fits your budget and price range. The inventory is constantly changing. It's

simple. Whether it's a new or pre-owned machine, if we don't have it – we'll find it. Give us a call or drop us an email. (413)-562-8653 or [info@SimplicityNE.com](mailto:info@SimplicityNE.com) Simplicity is in our name and how we do business.

# RENTALS

## When Only A Rental Unit Can Do – We're Here

We understand that some companies need quick, temporary solutions. That is why we have a diverse fleet of rental equipment available.

Our mission is to be good partners with our customers and that means being flexible in rental terms and contracts. Whether you need a short-term or long-term shredder, turner, screener, or separator, we can find the

make and model you need. We have a wide array of rental equipment that changes weekly. Our relationships in the Northeast or around the country have helped us find the right equipment for the job.

Find out how we can help you right now with long or short-term rentals. Give us a call or drop us an email. Simplicity is in our name and how we do business. Call us 413-562-8653 or [info@SimplicityNE.com](mailto:info@SimplicityNE.com)

# SERVICE

## It's Simple. If Your Equipment Is Down, You Are Out Of Business.

No one is more committed to service than we are. Your trust is the most precious thing we have and we understand if your equipment is not running, you are not in business. We have a complete service team of professionals and mobile service trucks that are available 24/7. Best of all, we work on all makes and models. When one of your machines goes down unexpectedly, you can count on Simplicity Equipment & Service to arrive at your jobsite quickly.

Our certified technicians are ready to diagnose and repair any problem they

encounter. Whatever the issue, we will do our best to get you back to work as fast as possible.

We maintain a state-of-the-art fleet of service vehicles to provide routine maintenance and 24/7 emergency repairs. Our trained, certified technicians are dispatched to your jobsite on schedule to minimize downtime.

Simplicity Equipment & Service certified welders and fabricators can complete any job to exact specifications, from attachment fabrication or modification to structural repairs or specialized accessory manufacturing. With a full-service paint shop, we can match the machine color of any manufacturer to restore your equipment to a "like-new" condition. Our expert painters can handle any job, big or small, and apply all decals to your specifications.

Simplicity Equipment & Service has a fleet of service trucks to provide quick, onsite service with 24/7 emergency availability.

## Complete Mobile & Onsite Services

Whether we are working in our facilities or on your jobsite, our diagnostic and repair tools are state-of-the-art to minimize your machine downtime regardless of weather conditions.

- A mobile service fleet with cranes
- Extensive experience with all makes and models
- State-of-the-art diagnostic equipment
- Most repairs can be made on the job site
- 24/7 emergency services
- Certified mechanics and technicians
- Preventive maintenance programs

*Simplicity's facilities are equipped with state-of-the-art diagnostic tools, so we can identify and correct problems quickly and cost effectively to get you working FAST!*

# PARTS

## When You Need The Right Part Fast You Need Us!

Material handling equipment is built for the worst conditions but they still break – especially when you can ill afford for it to be down. It is just a fact of life in the material processing industry. Finding a quality service technician is hard enough but finding the right part might be even tougher. With more than three decades of experience, we understand how to find the right parts at the right price quickly.

We have been helping New England material processing customers for more than three decades with parts for almost every make and model. As with all our business operations, we build relationships so when we need a difficult to find part quickly, we know where to go.

## Our Experience Reduces Down Time

Simplicity Equipment & Service is comprised of experienced professionals that understand customer needs and are committed to making everyone successful. A critical aspect of Simplicity's goal is delivering quality mobile service and parts for all makes and models so we help customers reduce equipment 'downtime' when issues arise.

From Astec to Komptech to Terex to Vermeer, we identify, locate, and ship parts as fast as humanly possible. It's not simple but we make it seem that way.
